The Standard Scale & Supply Co., Pittsburgh, Penn., has recently completed a contract for furnishing and installing weighing equipment for the Government of Uruguay at the Port of Montevideo.

On this contract the company earned $17,000 in bonus for finishing the work ahead of the contract time. This bonus, it is claimed, was earned through the efficiency and simplicity of the Standard Low Charging Concrete Mixers. These, it is stated, were so well attended and packed as to be practically ready for work as soon as landed.

Subway Anniversary—The first section of New York City's subway has been in operation for ten years, having been first opened on Oct. 27, 1904. Within three years after its opening the subway was carrying 400,000 passengers daily. At the present time it carries upward of 1,000,000 passengers for each week day, and has carried over 1,200,000 in one day.

Walter E. Buckingham, formerly manager of sales for the National Bridge Works, has organized the Buckingham Steel Co., Inc., with offices at 50 Church St., New York. In the past has also been connected with Post & McCord; Milliken Bros. and the Lackawanna Steel Co. The company will carry a line of structural steel and merchant shapes and will be prepared to fabricate material for early shipment.

The National Tube Co., Frick Bldg., Pittsburgh, Penn., has recently shown a series of industrial motion pictures at the Raleigh Hotel, Washington, D. C., and the Monticello Hotel, Norfolk, Va., illustrating the manufacture of "National" pipe. The pictures showed clearly the treatment of the ore from the time it was taken from the mine until it became the finished product.

Manufacturers receive War Orders—Orders for army supplies of every description continue to occupy the center of the stage in many lines of domestic trade. Wire manufacturers report a good demand for their products, especially barbed wire. It is learned that an independent company in the last week was offered an order for 5000 tons of this commodity for export to Russia, shipments to begin immediately, but the concern could only promise 250 tons in November, and 750 tons during December, which was unsatisfactory, the order ultimately going to the American Steel & Wire Co., a subsidiary of the United States Steel Corporation, which, it is understood, took the whole of the order, calling for approximately 15,000 tons.

The Chilean R.R. contract calling for 300,000 tons of coal a year for a period of three years, which has been offered to producers in this country, is being carefully studied. Representatives of 12 different coal companies in the Pennsylvania district, advices say, have visited the offices of the Pittsburgh Foreign Trade Commission to examine the specifications. It is admitted that there are difficulties in the way of acceptance, such as the chemical differences between Pittsburgh coal and the variety to which the Chilean railroads have been accustomed, the matter of tariffs, facilities of shipment, etc., but it is believed all these will be overcome.

The placing of the contract calling for 300,000 tons of coal in the Pittsburgh district each year would mean employment for large numbers of miners during what is ordinarily a dull season. Further than that, it would mark the beginning of a probable series of heavy orders for our American coal from many other sources in South and Central America. In the matter of transportation, it is understood that there is a shipping concern at New Orleans ready to inaugurate the business, and the Atlantic Coast vessels of the United States Steel Corporation are ready to undertake to some extent the handling of South American cargoes of coal.

Many cities in the Middle and Southwest continue to report receipt of new orders from foreign buyers for such army supplies as saddles, harness, saddle rings, blankets, cotton fabrics, etc. Some of this business is also going to New England manufacturers, advices from Meriden, Conn., yesterday stating that F. J. Wallace, saddlery and hardware manufacturer, had shipped 15,000 saddle rings during the week to warring nations and has been asked to bid on an additional 72,000 rings and also upon 10,000 complete sets of harness, but, as the latter was not in his line, this order was turned over to Massachusetts firms.

South America Hard Hit—Unable to secure funds, with their credit tied up in Europe, South American merchants are anxious for goods, but unable to pay for them. There is an enormous amount of business in South America, which can be developed. The people there want the goods but they have not any means whereby payment may be made. The appointment of receivers by the Federal Court for a Brazilian railway is a case in point, and it is well known that some of the largest exporting firms who have done business with South America for a great many years, have had fewer orders and more cancellations since Aug. 1 than in any like period for a number of years.

The Allegheny Foundry & Machine Co. has recently opened an office in the Oliver Bldg., Pittsburgh, to take care of the increasing business. A large machine shop and pattern loft were recently added to the plant of the company at Glassmere, Penn.
